

CORNWALL INSIGHT

CREATING CLARITY

Our Capabilities in Consultancy

Cornwall Insight's consulting team have provided pre-eminent project and advisory services to the UK energy and water sectors since 2010.

Our consultants are:

- **Trusted** – we are the commercial advisors to over 300 energy companies from generation, project development, energy retailing, network companies, investors, government departments and professional firms
- **Independent** – we are objective and adopt an analytically-driven consulting approach
- **Flexible** – we are agile and capable of delivering insight through multiple mediums, and can work collaboratively with other project advisors
- **Practiced** – our team has over 40 years of energy market experience from trading, retailing, energy procurement, renewables, flexible and thermal capacity, and policy and regulatory design
- **Comprehensive** – we evaluate the detailed market rules and we are at the forefront of regulatory change by sitting on a range of key-panels (BSC, CUSC, UNC) and working groups
- **Far-sighted** – we have a unique perspective in the market by working across retail, networks and generation, which enables us to provide in-depth and holistic insights across the whole energy chain

Ben Hall, Head of New Business

Ben advises a range of suppliers and generators at board and executive levels on strategic and tactical matters. He specialises in policy, regulation and market development in wholesale and retail markets.

Ben's areas of expertise include:

- Investment due diligence
- Renewable support and development
- Routes to market and PPAs

Supporting Some of the World's Leading Energy Companies

Foresight
group

Department for
Business, Energy
& Industrial Strategy

Confidential

Type: Investor
Project: Investment DD
Year: 2016-18
We supported this investor with assessing the possible revenue streams for a battery storage site as part of its due diligence for acquisition. The review included analysis of regulatory risks.

Type: Govt department
Project: Policy guidance
Year: 2017-18
Cornwall Insight developed a range of guidance documents for BEIS and stakeholders focusing on maximising revenue streams from the provision of heat from the heat networks.

Type: Infrastructure investor
Project: Technical audit in the private wire arrangement
Year: 2018-present
Cornwall Insight undertook a review of the charging and cost allocation methodology that will govern the trading and risk management under the private wire arrangement between consumers and generators.

 **Utility Regulator**
ELECTRICITY GAS WATER

Confidential

LOW CARBON
CONTRACTS COMPANY

Type: Regulator
Project: Policy support
Year: 2015-17
Our consultants undertook several separate phases of work, including reviewing the effectiveness of competition in the Northern Ireland energy retail market.

Type: Water company
Project: Bespoke electricity TPC forecasts
Year: 2016-present
These projects involved the development of site-specific electricity third party charge forecasts for the purposes of business planning and submission of the regulated business costs for price controls.

Type: Govt body
Project: Policy support
Year: 2018
Cornwall Insight has been working with the LCCC to develop thinking on the possible simplification, streamlining and alignment of processes for the CFD and CM schemes.

 **Which?**

Confidential

Wheelabrator
TECHNOLOGIES

Type: Consumer rep
Project: Impact assessment
Year: 2018
Our consultants used primary research to understand the possible impacts of the price caps on innovation in both energy and other markets. The report has been published on the Which? website.

Type: European Utility
Project: Consultation responses
Year: 2016-present
Cornwall Insight has provided a range of support to this European utility to respond to key industry consultations across both policy and regulation.

Type: Developer
Project: Energy advisor role
Year: 2015-present
We have been the retained energy advisor for this energy from waste developer since 2015, with support including licensing and route to market assessments.

Our Leading Experts

Our consultants are industry experts first and consultants second. They have broad and in-depth knowledge of their specialist areas having worked in and studied the industry for several years.

Ben Cerini, Consultant

Ben provides advice to clients on business case development, energy storage and modelling. He is a trained lawyer with international energy experience gleaned in the US.

Ben specialises in:
